### A Significant UFO Document

The Phoenix Days have arrived on Earth as strange planetary changes take place everywhere. Catastrophes are increasing worldwide—record breaking heat, wildfires and floods, giant fissures opening up, mysterious booms coming from underground, devastating tornadoes and hurricanes, strange sightings in the sky, toxic water everywhere, and animals and sea creatures dying mysteriously worldwide. These events were foretold to indigenous people and Native Americans for years by extraterrestrials known as the *Star Beings*. Earth Mysteries investigator and renowned psychic Betsey Lewis was shown the same prophecies given to Indigenous elders shortly after a UFO encounter at age seven. She believes the recent glowing bird captured over Teton National Park by a webcam was the legendary Phoenix warning humanity of massive cataclysms will increase and to prepare.

There are those who, within their hearts, sense monumental events coming; for these are the ones who understand ancient wisdom and will be prepared for the changes as the Phoenix takes flight over the planet. Earth mysteries investigator and renowned psychic Betsey Lewis offers stories of ancient aliens, Reptilian abductions, abductees, alien-human hybrids, cattle mutilations, the mysterious booms heard worldwide, chemtrails, and crop circles. This book also includes monuments found on Mars, a great Martian civilization that died instantly, the mysterious booms heard worldwide, time travelers, time shifts, frightening stories of UFOs firing on Vietnam US soldiers, strange religious visions linked to aliens, and startling prophecies linked to the Star Beings. Will Earth be destroyed by humans and their destruction of the environment, by aliens or Planet X?

This book will change the way you view our planet, our relationship to Star Beings, our governments and their knowledge of UFOs and aliens, and the future of our planet. A new world is coming sooner than we think!
